T-Ride Mobile API Documentation

Overview

This document provides a comprehensive guide to the Mobile API endpoints for the T-Ride application. The API supports Riders, Drivers, and Food Vendors.

Authentication & Profile

Base Path: `/api/app`

Endpoint	Method	Auth Required	Description
`/login`	`POST`	No	Login using credentials (Identifier & Password).
`/send-otp`	`POST`	No	Send OTP via SMS, Email, or WhatsApp.
`/verify-otp`	`POST`	No	Verify OTP to authenticate.
`/register`	`POST`	No	Register a new user (Customer or Driver).
`/get-profile`	`GET`	Yes	Retrieve current authenticating user profile.
`/save-location`	`POST`	Yes	Update user's current latitude and longitude.
`/submit-feedback`	`POST`	Yes	Submit app feedback or ratings.
`/logout`	`POST`	Yes	Invalidate the current session token.

Ride Services (Customer/Rider)

Base Path: `/api/app/rides`

Endpoint	Method	Description
`/nearby-drivers`	`POST`	Find active drivers within a 5km radius based on vehicle type.
`/estimate`	`POST`	Calculate estimated fare and distance between pickup and drop-off.
`/request`	`POST`	Create a new ride request (Searching or Direct Assignment).
`/active`	`GET`	Get details of the current active ride.
`/{id}/cancel`	`POST`	Cancel a ride request before/during the trip.
`/{id}/rate`	`POST`	Submit a 1-5 star rating and comment for a completed ride.

Food Delivery (Customer)

Base Path: `/api/app/food`

Endpoint	Method	Description
`/home`	`GET`	Get categories and nearby/featured vendors.
`/vendor/{id}`	`GET`	Get vendor menu, products, and details.
`/order/place`	`POST`	Place a food order with multiple items.
`/order/{id}/track`	`GET`	Real-time tracking of order status and driver position.
`/user/addresses`	`GET`	Get saved user delivery addresses.

Driver Controls

Base Path: `/api/app/driver`

Endpoint	Method	Description
`/profile-setup`	`POST`	Initial setup for driver information (Vehicle, Region).
`/upload-docs`	`POST`	Upload CNIC, License, and Vehicle documents for approval.
`/status`	`GET`	Check account approval status and online/offline state.
`/toggle-online`	`POST`	Switch between Online (Accepting Jobs) and Offline.
`/dashboard`	`GET`	View earnings (Today, Weekly, Monthly) and trip stats.
`/ride-requests`	`GET`	Fetch new incoming ride requests matching vehicle type.
`/ride/{id}/respond`	`POST`	Accept or Reject a specific ride request.
`/ride/{id}/status`	`POST`	Update ride status: `arrived`, `in_progress`, `completed`.

Wallet & Payments

Base Path: `/api/app/wallet`

Endpoint	Method	Description
`/data`	`GET`	View current balance and transaction history.
`/add-money`	`POST`	Deposit funds into the wallet via payment gateway.
`/withdraw`	`POST`	Request withdrawal of funds to bank/mobile account.

Rental Services

Base Path: `/api/app/rental`

Endpoint	Method	Description
`/items`	`GET`	List available items for rent (Equipments, Cars, etc.).
`/item/{id}`	`GET`	Detailed view of a specific rental item.
`/book`	`POST`	Book an item for a specific duration.
`/my-bookings`	`GET`	View history of rental bookings.

Use Case Diagram (Logic Flow)

```
graph TD
    subgraph "Customer"
